

com.mysql.jdbc.Connection  
Properties.getFailOverReadOnly

```
graph RL; A["com.mysql.jdbc.jdbc2.optional.ConnectionWrapper.getFailOverReadOnly"] --> C["com.mysql.jdbc.ConnectionProperties.getFailOverReadOnly"]; B["com.mysql.jdbc.MultiHostMySQLConnection.getFailOverReadOnly"] --> C;
```

The diagram illustrates the inheritance of the `getFailOverReadOnly` method. On the left is a gray-shaded box representing the base class `com.mysql.jdbc.ConnectionProperties.getFailOverReadOnly`. On the right are two white boxes representing subclasses. The top box is `com.mysql.jdbc.jdbc2.optional.ConnectionWrapper.getFailOverReadOnly`, and the bottom box is `com.mysql.jdbc.MultiHostMySQLConnection.getFailOverReadOnly`. Blue arrows point from each of these two boxes to the left box, indicating that both subclasses inherit the method from the base class.

com.mysql.jdbc.jdbc2.optional.  
ConnectionWrapper.getFailOverReadOnly

com.mysql.jdbc.MultiHost  
MySQLConnection.getFailOverReadOnly
