

com.mysql.jdbc.NonRegistering
Driver.parseHostPortPair

```
graph LR; A[com.mysql.jdbc.NonRegisteringDriver.parseHostPortPair] --> B[com.mysql.jdbc.StringUtils.startWithIgnoreCase]; A --> C[com.mysql.jdbc.Messages.getString];
```

The diagram illustrates the execution flow of the `parseHostPortPair` method. It starts with a call to `com.mysql.jdbc.NonRegisteringDriver.parseHostPortPair`, which then branches into two parallel calls: `com.mysql.jdbc.StringUtils.startWithIgnoreCase` and `com.mysql.jdbc.Messages.getString`.
